

Continuous. printing on all materials

Print on any surface including:
plastic, glass, metal, paper, board

Simple to install and operate

Uses a sealed ink cartridge
with fast drying ink

Print speeds up to 100
meters/minutes

Uses interchangeable
baselock type
or flat stereotypes

Smart thinking: *Smart printing*

Sauven 

www.sauven-marking.com

A simple printer to continuously print your product at high speed using *fast drying sealed ink cartridges*.

Clean - operator never contacts ink

Automatic control of ink flow

Will print immediately even when unused for several days

Cartridge replaced in seconds

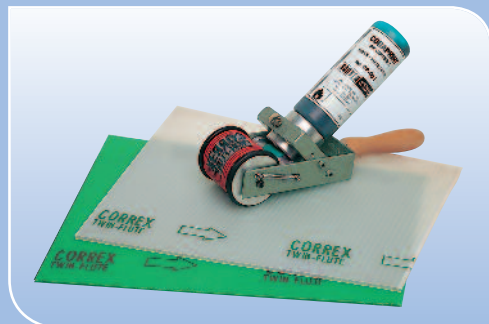

Printing never fades

Colour change in seconds

Choice of print

The standard Codaprint type drum is fitted with metal locking rings for use with Baselock interchangeable rubber type. Baselock is available in many character styles and customised logos, to enable a quick change of print.

The type drum can also be made on request to suit 3.2mm flat stereotypes.

Handroller

Applications

The Codaprint is used to apply identification marks, use by dates, recycle logos, customer product names etc onto material which is continuously moving, or indexing, and where a repeat print is required. Some typical applications are on extruded film, bag printing, steel sheets, plastic window extrusions, shrink wrap film, cardboard core windings, Gypsum board, edge pack board, backs of mirrors and paper.

Inks

Ink Cartridges are available in a range of ink types and colours to suit most surfaces.

We can advise you on the most suitable range for your product.

Simple to install

The Codaprint is easily mounted on a fixed bar across the material to be marked. Vertical adjustment on the unit gives print on/off positions. The printer is driven by frictional contact between the rubber tyres on the type drum, and the material.

Registered print

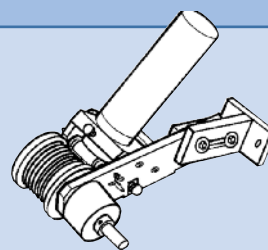

A driven Codaprint is available with a drive shaft to give an accurate registered print, where the drive is taken from the parent machine, and with a type drum circumference to suit the application.

Handroller

The Codaprint hand roller is for manual printing onto all surfaces with the same range of fast drying inks.

Codaprint Printer Specification

Model	CP-24/1	CP-17/B Handroller
Print Length	240mm	175mm
Print Height	25mm	25mm

Codaprint Cartridges

CP001	Black	Standard Dye ink for non porous material
CP011	Black	Extra fast drying dye ink for high speed non porous material
CP5610	Black	Dye ink for porous surfaces
CP256P	White	Pigmented ink for dark coloured surfaces, porous and non porous material.

A selection of colours is available in each range
